

DYING AND DEATH, WITH SPECIAL REFERENCE TO BRAIN DEATH. A BIBLIOGRAPHY*

B.A. BLAIR-ST. GILES and H. HILLMAN

Unity Laboratory, Department of Human Biology and Health, University of Surrey, Surrey, GU2 5XH (United Kingdom)

(Received November 5th, 1982)

SUMMARY

A bibliography of dying and death has been made, with special reference to the brain. It does not claim to be comprehensive. Short references have been omitted unless they contained new information not published elsewhere. When books or papers have been written in other languages, their titles have been translated, and their original languages indicated. It has not always been possible to find the complete page references to these.
