DETROIT, MICHIGAN

Wm. F. Koch, Ph. D., M. D.

November 5, 1936

Dear Doctor:

The keys to the natural immunity of good health are the catalysts of vigorous oxidation, Glyoxylide O=C=C=O, and Malonide, O=C=C=C=O. They are the suboxides of carbon, and the double internal anhydrides of Glyoxylic and Malonic acids respectively.

Wherever functional disturbance, inhibited development, and the susceptibility to infection are present these catalysts have been extinguished, and the oxidation process so basic to all function is crippled. They must be replaced to restore normalcy. Therefore, allergic or endocrine malfunction, deficient, or neoplastic maldevelopment, and the inability to burn up toxins essential to the life of infectious organisms, can be corrected by restoring a vigorous oxidation catalysis with Glyoxylide or Malonide. Thus truly fundamental recovery results.

Many progressive physicians throughout the world have proven these statements in practice, in tuberculosis, leprosy, cancer, infantilism, idiocy, psoriasis, and the common allergies.

As early as 1924, one chairman of the Board of Trustees of the American Medical Association wrote the results of his investigation of this treatment; thus, "Whatever the substance is, it is efficient".

Generally one or two treatments only are required for full recovery, or where that is impossible, for gratifying relief. However, patients with full diagnosis of far advanced malignancy by our best institutions, have recovered fully even when treated during their "terminal" coma.

The extremely unstable nature of both substances has made their identification in their important physiological and immunological roles a most difficult task. But to devise a means of stabilizing them in aqueous solution for practical employment by the profession is an achievement we are quite happy about, for ordinarily on contact with water they revert immediately to the parent acids or undergo quick oxidation or polymerization.

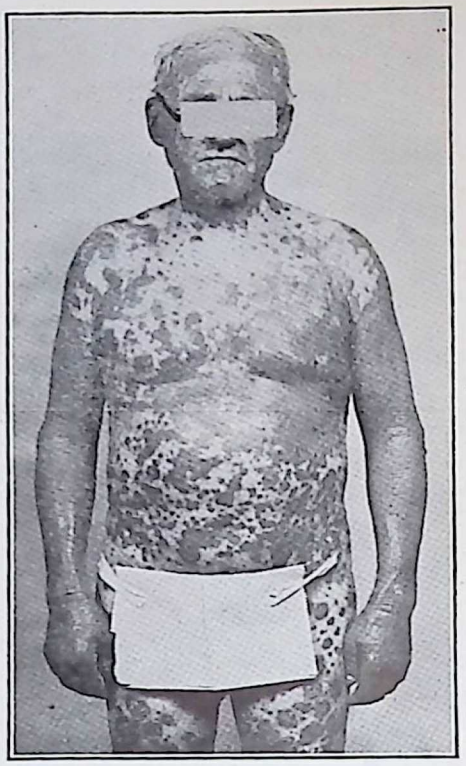

We supply them to the profession in active form in ampoules with sterile properly prepared syringes and needles ready for use. Our book, "Natural Immunity, Its Curative Chemistry in Neoplasia, Allergy, Infection", with recent survey of reported cases, will be sent on request.

Fraternally yours,

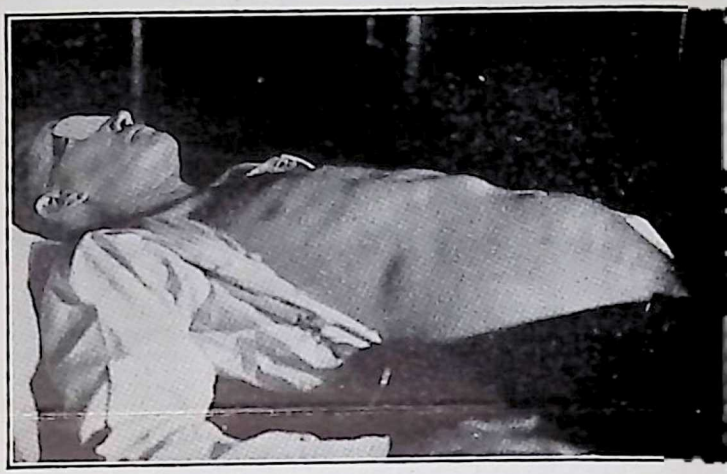

Wm F Koch Ph.D., M. D.

★ ★ Some Examples of E

"Natural Immunity—Its Curative Cher

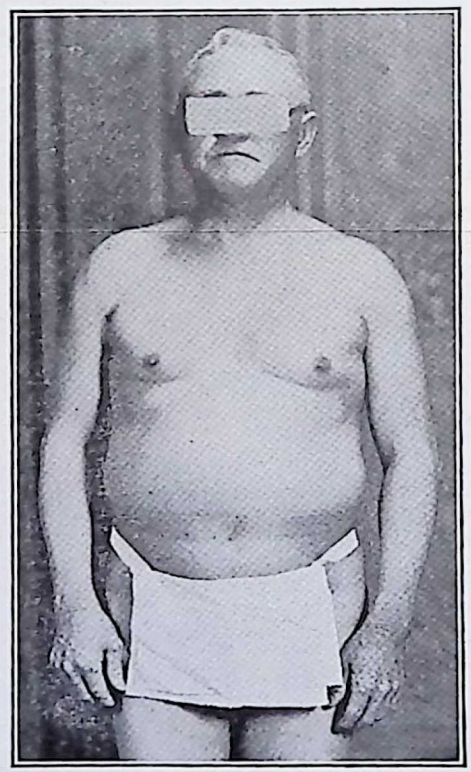

Mr. C. before treatment.
4 years of intense suffering with psoriasis.

Mr. R. before treatment. Note the bulging of the cancer masses throughout the abdomen.

Mr. R. showing recovery after one injection of Glyoxylide—Abdomen completely normal. All traces of the cancer masses have been absorbed.

Mr. C. showing recovery after 2 injections of Glyoxylide.

Mr. R—abdomen drawn in to show the freedom from cancer growths Recovery complete.

fficiency Taken from ★ ★

iistry in Neoplasia—Allergy—Infection"

Mrs. W. before treatment showing typical exophthalmus from toxic goitre, complicating extensive cancer of the stomach.

Mrs. W. showing recovery after one injection of Glyoxylide.

Miss P. before treatment showing metastases of recurrent cancer of breast over the clavicle, after surgical escarotics. There was also well-developed metastasis in the axilla and infiltration of breast area.

Miss P. after treatment with two injections of the "Glyoxylide," showing disappearance of the recurrences. She has remained perfectly well with every trace of cancer abolished.
